3rd Annual Symposium for Research Administrators

The UNC-CH Research IT Landscape
An overview of the systems that support the research enterprise

John Stephenson – john@unc.edu

July 29, 2016
Research Administration – Online Systems

- IRBIS - IRB protocol management
- ACAP - Animal protocol management
- RAMSeS – Pre-Award/Proposal development and award mgmt.
- ConnectCarolina – Campus HR and financial system
- Cayuse 424 – Electronic grant submission to the sponsor
- ECRT – Sponsored Effort Certification and Reporting
- AIR - Conflict of interest management
- Blue - Intellectual property management
- CRMS/ALICE - Clinical trial management
IRBIS – IRB Information System

http://irbis.unc.edu

- Online submission/tracking of initial, modification, renewal, closure and unanticipated problem/adverse event submissions
- Online form is a smart form that guides you through the proper questions
- Consent forms are auto filled for you as you proceed through the submission process using standardized consent form templates.
- Electronic PI certification and department approval.
- Office of Human Research Ethics/IRB committee review
- Electronic notification of approval or required revisions
- Electronic notification of required annual renewal
ACAP – Animal Care Application

http://acap.unc.edu

- Online submission/tracking of animal protocols including new studies, continuations, amendments, and annual renewals
- Online form is a smart form that guides you through the proper questions
- Electronic PI certification
- Office of Animal Care and Use/IACUC committee review
- Electronic notification of approval or required revisions
- Electronic notification of required annual renewal
- Once approved, animal orders and various cage card requests can be submitted within ACAP
- Management of chart fields used to pay for DLAM charges
- View Invoices generated during the monthly DLAM billing cycle
RAMSes

http://ramses.unc.edu

- Pre-award/Proposal Development
- Electronic PI certification and department approval.
- Office of Sponsored Research/Sponsored Programs Office review
- Award Setup tasks, including compliance review
- Budget fed into ConnectCarolina
- Proposal and Award based reports
- ConnectCarolina for project based expenditures
Cayuse 424

http://unc.cayuse424.com

- Proposal development for submitting electronically to sponsor
- List of opportunities within the system
- Built-in validation engine that improves first-time submission success
- ORIS sets up access for first time users
eCRT – Effort Certification and Reporting

http://ecrt.unc.edu

- University required to track and have sponsored effort certified by those paid off of research funds
- Certification period is currently every 6 months.
- Researchers can adjust effort if they find it to be incorrect at the time they certify
- 30 days to certify once certification periods are opened
- Departmental and Project based views
AIR – Activities, Interests, and Relationships

http://air.unc.edu

- Conflict of interest management
- Disclosures generated from IRBIS and RAMSeS
- Electronic notifications go out when created
- Disclosure status visible in IRBIS and RAMSeS
- Award processing can be held up if not all disclosures responded to
- External Professional Activities for Pay (EPAP)
- COI Training http://coi-training.unc.edu
Blue – Report of Innovation and Licensing

http://apps.research.unc.edu/blue

- Report of Innovation (ROI)
- Licensing and Commercialization
- Visit [http://research.unc.edu/offices/otd](http://research.unc.edu/offices/otd) for more information about the licensing process.
- Incoming and Outgoing Material Transfer Agreements
CRMS and ALICE – Clinical Trial Process

- Pre-study tasks:
  - Budget approval
  - Investigational Drug Services (IDS)
  - Agreement initiation: Clinical Trial Agreement tracked/worked in ALICE but status visible in CRMS
- Study record is fed from CRMS into EPIC electronically
- CRMS controls who can access what within EPIC at study level
- For studies with billing components, CRMS is used to track enrollment, which feeds into EPIC electronically.
- CTRC scheduling is managed within CRMS
