Disinfect surfaces that you come into contact with, such as:

- Technology
- Household Surfaces
- Vehicles
- Wallets & Purses
- Credit Cards

**SAFETY TIPS**

If bleach solution irritates the skin, it’s likely too strong.

NEVER mix any of these products together, only mix with water.

**BLEACH** | hard surfaces
---
1 tablespoon of household bleach
1 quart of water

**HYDROGEN PEROXIDE** | soft surfaces
---
1 part over-the-counter hydrogen peroxide
1 part water

**ISOPROPYL ALCOHOL** | technology
---
over-the-counter isopropyl alcohol, 60% or stronger

**GENERAL TIPS**

- Apply any of these three mixes to surfaces, let stand 5-10 minutes, then wipe down.
- For hydrogen peroxide, make small fresh batches daily.
- Label your bottles and reuse the bottles for the same disinfectant over time.
